Talent Statement

Experienced Business Analyst and Information Management professional focused on translating business needs into practical digital solutions. Strong expertise in M365, Power Platform, AI Agents, process analysis, and stakeholder engagement, acting as a bridge between business teams and technical developers.

At Shell, I have led business analysis activities for initiatives including AI Agent programs, Petrobras data extraction processes, BDO automation and routing solutions, SharePoint platforms, and workflow optimization projects.

Recognized for capturing requirements, mapping processes, facilitating workshops, documenting solutions, and driving alignment between business objectives and technology capabilities. Delivered measurable value through automation, governance, and digital innovation, including \$6MM NPV via AI Builder for NOV assets in Brazil. Recognized with the KYI IM Rising Stars Award (2024).

Career Interests

Job Interests: 52735827 - IT Projects Business Analysis JG5M

Career Preferences: Yes, I am available for next role and actively looking.

Career Interests:

- Business Analysis & Digital Transformation:** I am interested in Business Analyst roles where I can partner with stakeholders to understand business challenges, define requirements, and translate needs into practical technology solutions. My focus is on connecting business objectives with digital capabilities to deliver measurable value and process improvements.
- Process Improvement, Requirements & Solution Design:** I have experience analyzing business processes, identifying improvement opportunities, and supporting solution design across Information Management, Power Platform, SharePoint, and automation initiatives. I focus on delivering solutions aligned with business goals and user needs.
- AI, Automation & Innovation:** I am passionate about AI, automation, and digital transformation. Through AI Agent initiatives and business-led technology projects, I have helped bridge the gap between business stakeholders and technical teams, supporting the delivery of scalable and innovative solutions.
